THE NATIONAL BOARD RECEIVES INFORMATION.

The Latest from Memphis....The Feyer Holds Its Own---Quarantine Embargo---Rifle Guard.

WASHINGTON, August 22.-The National Board of Health has received a telegram from Dr. Craft, of New Orleans, stating that the location of the new case of yellow fever reported is 233 Dumaine street. It is probably the result of an infection from the firs t cases on Constance street. Another case is reported this morning ot 477 Constance street in the infected region. The patient was taken sick August 16th. Isolation and disinfection have been enforced. The National Board is also in receipt of the following telegram from Havana: "Barks Black Prince, for New Orleans, and W. H. Glenn, for Baltimore, had yellow fever on board while here. The Spanish polacre, Augustine, for Pascagoula, not known.

(Signed,) HULL, Consul General." MEMPHIS, August 22.-Two new cases of fever were reported to the Board of Health this morning. Ten deaths occurred since last night, A. K. Speers, Samuel Cross, Mrs. Dena Goldcamp, Hivam Hilscher, James K. Murray, Emma Moore, Phil. J. Ryan, Mrs. S. W. Phillips, Samuel Rhodes and A. L. Rhodes. The four last died beyond the city limits. The daily mail service over the Louisville and Nashville rallroad was resumed this morning.

A Church Question.

NEW YORK, August 22 .- The question of the right of cemeteries controlled by the Catholic church to pre interment, in consecrated ground, of those who had in their lifetime belonged to secret societies, will come before the courts to-day in a test case brought by relatives of Dennis Coppers, who was accidentally killed week. Coppers was a communicant of the Episcopal church, and his relatives were Roman Catholics. The body was placed in the receiving yault of the cemetery, pending a decision of the Vicar General, and this being adverse to Coppers his friends have applied for a temporary injunction to prevent its removal, and this will be argued to-day before Judge Brunt. The case is exciting much interest.

DURHAM NEWS.

Ixflux of Editors---Removal of an Old Landmark.

Correspondence of the News. DURHAM, August 22.—For some ten days several ladies have had in course of preparation an entertainment, musical and dramatical, for the purpose of procuring a flag for the Durham Light Infantry. Last night the affair came off at Duke's Hall with success that astonished the most sanguine. The hall was crowded to its utmost capacity with the best people of the town. The boys were out in their uniform, and lent a lovely charm to the interesting occasion. The entertainment consisted of songs, music by the band, concluding with the celebrated drama entitled, "The Last Loaf," and to say the parts were well taken is not enough. Your correspondent has had the pleasure of witnessing the performances of a great many fine actors and actresses, and he thinks those who took part in the play last night would have done credit to the boards of any theater. We have just been informed the performance will be repeated to night for the benefit of the Beaufort sufferers; if so, we bespeak for them "a big house."

THE PRESS GANG. This body of gentlemen were met at the 5 o'clock train yesterday afternoon by the Durham Light Infantry Band, and an invitation extended to them by Messrs. W. T. Blackwell & Co. to repair to the Central Hotel dining room where refreshments were prepared. The invitation was accepted and the refreshments enjoyed, and seemingly appreciated. The conductor called out all-aboard," the bell rang, and with a hearty three cheers for the Durham Bull the press gang left Durham.

This old building is about the first business house erected in Dur-ham, and when built was in an old field. It is an ugly, rockety building, and has been used several years as a negro tenement house. Its removal is a relief, for it was getting to be quite an eye-sore. We understand a large warehouse will be erected on its site.

BRITISH COTTON'S DECLINE. The Most Remarkable Changes that

are in Progress. Philadelphia Ledger.

It is no longer a question that the manufactured as well as agricultural products of the United States are to exort a controlling influence in the markets of the world. The changes that are in progress are of the most remark able character, and their more important consequences are to be felt much sooner than has been supposed. The English journals are full of alarms and speculations on the subject, and the statistics they furnish of the decline of the cotton industry at Oldham and Manchester are conclusive that a great change has already occurred in that center of textile fabrics. A redistribution of the vast populations of these manufacturing districts of central England appears to be inevitable, and already large numbers of the Sheffield workmen are preparing to emigrate to the United States. The decline in Sheffield and Birmingham industries began earlier than in Manchester, and it has already proceeded further, both as regards the introduction into English markets of like articles from Amerca, and as to the decline or actual breaking up of manufacturing estab-lishments. Yet the recent reports that almost every cotton factory of Oldham and Manchester has been worked at a loss for the last year has created a greater sensation than any single event pre-

viously reported. Statements in regard to the reluctance of English masters to introduce im-provements in the process of these manufactures confirm the belief that American cotton goods will actually enter largely into consumption in England before the mills now existing there will make goods like them. English cottons are almost all adulterated sized with clay and "weighted" with 100 per cent. on an average of mere waste, and such is the rigid constraint that forces them all forward in a course, once adopted, that no single establishment is bold enough to come out and make goods in the American fashion, of pure cotton. Meanwhile the sale of American cottons increases daily in England, as well as in the distant markets which have been under the exclusive control of England for an indefinite period, and as the competition is not one of prices but of intrinsic qualities, the end must be the introduction of pure cottons in place of those made inferior by adulteration. And the only way for the Manchester manufacture to maintain his footing is to make goods precisely as we make them. This appears to be difficult if not impossible

WHY DIXON WAS KILLED

THE PRIME CAUSE THAT LED TO HIS DEATH.

What Two Prominent Mississippians Say Regarding the Matter---Considered a Dangerous Man.

Washington Post, 21st.

Among the gentlemen seated in the rotunda at Willard's, last night, were Judge Harris and Gen. Nat Harris, of Mississippi. They are two of the most influential citizens of that State. For many years the judge presided over the Vicksburg circuit, and his political opinions are tempered with judicial moderation. His brother, General Nat Harris, commanded the fighting Mississippi brigade under Stonewall Jackson, and is a favorite among the people of his State. The Post took a seat beside the two gentlemen and introduced the subject of the killing of Captain Dixon, in Yazoo county. Said the judge: "There is an entire misapprehension of this whole matter in the minds of the Northern people. This was not a contest between the Democratic and Republican parties, or between any political parties. It was not a question of free franchise, either. It was an attempt on the part of the people to put down the bull-dozers and suppress lawlessness and disorder. Dixon and his confederates were kicked out of the Democratic party; they were repudiated by it because they believed in the rule of the shot-gun and the revolver. In 1875 Dixon led the bulldozers, and his acts brought censure upon the people of our State. This year he claimed to have rendered valuable services to party, and demanded, as his reward, the nomination for sheriff. The people refused to recog-nize his services, and, as I have said, repudiated him and his followers. He hen sought to organize the negroes

business interests of the people. They were contending for those interests."
"Dixon was a man of unquestionable courage," said General Harris, "and was far more dangerous, because of that, as a leader of the negroes than the carpet-baggers. He was bloody up to the elbows. He had killed five or six

and array them against the whites. In

short, to impose upon the people the evils from which they had freed them-

selves. This was a retrograde move-ment, and it involved the social and

men."
"What was the difficulty between "Barksdale," replied Judge Harris, "is a candidate for chancery clerk, and as a Democrat, who desired law as order to prevail, he had denounced Dixon. This led to the difficulty. Barksdale is one of the most prominer and popular citizens of the county. He is engaged in business in Yazoo, ha property there, and wants peace and quiet and amicable relations between the two races to prevail. He, too, is a brave man, and knew the risk he ran in denouncing Dixon."

General Harris repeated what the judge had said to the effect that this contest was waged by the law observing portion of the population against the lawless class; that as a rule the property holders whose all was at stake were opposed to Dixon, because he was constantly engaged in some lawless ac-tion, and, in addition to keeping the county stirred up, brought reproach upon it from abroad.

The Tugoloo Mystery.

Courier-Journal, August 19th. A special has just been received of the further sinking of the large mountain in North Georgia, which dropped into a suddenly made chasm some time since. This mountain, known as Tugoloo, is an enormous one. It is more than two miles about its base, and is about as high as Stone mountain. Some months ago a thundering noise was heard as if a lively earthquake had had suddenly commenced operations. A gentleman who was going by the Tugoloo mountain looked toward it and was amazed to see fully one-third of the enormous mass break loose from the rest and suddenly sink into the earth beneath, carrying with it immense trees, stones, etc. After a few days the scene was visited, and it was found that the ground on which about one-third of the mountain was resting had opened or broken through, and the mass, thus being left without support, tumbled into the chasm provided for it. It apparently about filled this chasm to a level with the ground, but has since been sinking. No one can imagine the cause, and fears are entertained that the rest of the mouhtain must follow. The side from which the falling mass was torn is rugged and irregular, no stratification having been followed in the tearing loose. The mass has just let down about two feet further, and the whole case will be investigated by competent scientists, who are determined to probe the secret of the lost mountain.

THE GRAVE ROBBERS.

A TALK WITH MRS. STEWART'S PHYSICIAN.

Mrs. Stewart and Judge Hilton in Perfect Accord-Negotiation for the Return of the Body.

New York Tribune, 20th. Dr. John C. Minor, Mrs. Stewart's physician, was called upon at the Grand Union Hotel this evening, and inquiry was made if he had any information which he was willing to give to the public in regard to the efforts to recover the body of the late A. T. Stewart. Dr. Minor is a may rather under middle age, quiet and alert in conversation, and polished and pleasant in manner. He said that he did not care to add to anything to the letter published in the Tribune to-day. Whatever information he possessed came to him in his capacity as family physician, and he was not at liberty to disclose it. Moreover, he had not sought to inform himself, as he preferred to be able to plead a lack of knowledge in answer to the inquiries of friends. He would say, however, that Mrs. Stewart had feit very keenly the injustice done Judge Hilton in the report that he had deceived her and induced her to believe that the body had been recovered. She had entire confidence in Judge Hilton, who had kept her fully acquainted with every step in the case which she desired to know. She felt also the injustice to perself in the idea that she could be so weak as to be so easily deceived as this report claimed. She therefore desired ner physician to write the letter to the

Mr. Minor would say little more about the case, but in the course of conversation it was learned that Judge Hilton had received many communications from persons representing the thieves. They at first dem added \$2, 500,000 for the return of the body, but finally reduced their demands, step by step, to \$200,000. General Jones had been only one of several persons through whom letters had come from the grave-robbers. Every effort had been made to trace these communica-tions and to get at the original sources. The Montreal clew, or supposed clew, had been thoroughly examined without result. It was not now believed that the body had ever been taken to Montreal. It was thought like that it might not be far from New York. A great amount of money and an im-mense amount of labor and time had been spent in tracing every possible clew, in going every bit of ground that afforded the faintest promise of success. In these investigations it had been position in New York, were connected with the robbers. Their names might yet be disclosed, and would startle the community. Propositions had been made to Judge Hilton to go to various places in the State, where it was promised the body would be delivered. In fact, there had been proffers, suggestions and negotiations of the most varied and remarkable sort; but Judge Hilton had no disposition to pay for the return of the body without the arrest of the criminals. The robbers had tried in every way to bring him to their terms, but he was inflexible. They were holding out, and he was holding out; and in patience, persistence and determination he was more than a match for them.

Dr. Minor said he believed that neither Judge Hilton nor Mrs. Stew-art would ever consent to the terms of the grave-robbers. The Judge showed no inclination, at present, he thought, to pay more than \$25,000 for the return of the body, and would not compro-mise at any price in the way of prom-ising immunity to the criminals. Dr. Minor said he knew nothing about Dr. Carney's detective work, and very little about Dr. Carney himse f. He did not know where Dr. Carney had gone. He himself was inclined to take a hopeful view of the case, and to be-lieve that the body would yet be re-covered, and the criminals be brought o justice, but he admitted that he had no special knowledge of recent prog-ress made in the case to establish a firm foundation for such a belief.

A Remarkable Counterfeit. Washington Post. The sub-treasury department at New Orleans has come across a counterfeit silver quarter, a remarkable feature about which is, that it is intrinsically more valuable than the genuine quar-ter dollar. According to Mr. M. V. Davis, the efficient coiner at the mint to whom it was sent to be assayed, it weighs 978 grains, or 135 above legal weight, and contains fifty millimes of gold, which silver coins do not contain, except in rare instances. Mr. James Albrecht, the assayer, reports that its fineness is 950 thousandths silver, and three thousandths gold. The only defect about the piece is in the engraving of the words "In God we trust." The word "America" is abbreviated to 'Ames," in the words "United States of America."

Maryland mosquitoes have killed little Timmy Stewart near Hilly o' Neck. The boy had been sent out to keep up a fire in the field, to drive away the mosquitoes from cattle. The Claim for Damages for the Fortune Bay Outrages.

A Washington dispatch states that the claim for \$103,000 damages on ac-count of illegal interference with American fishermen at Fortune Bay, which Mr. Welsh, under instructions from the State Department, has presented to the British government, is not a claim for a restoration of that or

apy other part of the Halifax award upon the ground of non-fulfillment of treaty conditions. The award is con-sidered res adjudicata, and this gov-ernment has no intention of making any claim for abatement or any request for a reconsideration of the amount awarded based upon the subsequent ill-treatment of its fishermen, or the continued non-recognition of their treaty rights. The present claim is for a specific grievance, and is to be considered without reference to the amount of the Halifax award, with which it has nothing to do. Mr. Welsh was instructed to base the claim for \$103,000 upon the actual loss and damages sustained by American fishermen in con-sequence of the violent invasion of their treaty rights at Fortune Bay, and to obtain some security against the re-currence of similar offenses in future. Advices received by the State Depart-ment from the North American coast represent that although no actual vio-lence has occurred this year, our fish-ermen are deterred by the apprehension of violence from approaching the shore and carrying on their business with the freedom guaranteed to them by treaty, and that we are therefore deriving no benefit from our agreement with the British government and getting no return for our money. The state of feeling which prevails between our of feeling which prevails between our north-coast fishermen and the British-American fishermen, who consider themselves justified in using force to carry out local prohibitory laws, is re-garded by our government as extremely dangerous and liable at any moment to lead to bloodshed and serious interna-

tional misunderstanding; and it is

therefore very anxious that some step

shall be taken by the British govern

ment to do away with the local pro-

hibitory laws of Canadian provinces, which now practically override and nullify treaty provisions of far higher authority." The Killing of Dixon. Atlanta Constitution, 21st. Our telegrams bring the information that Captain H. M. Dixon, whose life was threatened by a mob of so-called Democrats in Yazoo county recently, has been shot to death in a difficulty growing out of the excited state of political affairs in that section. It is almos impossible to comment calmly upon this wretched affair. And yet such a result was to have been expected. It is the natural and legitimate outcome of that species of ruffianism, which, assuming Democracy as a cloak, recently made itself manifest in the attempt to drive Captain Dixon out of the country if he refused to retire from the canvass There are no boundary lines between ruffianism of this sort and murder. Mob rule is anarchy and anarchy breeds assassination, and all the long train of horrors that religion, and society, and civilization have been fighting against since the world begun. We have been claiming that the States are able to enforce their own laws and to maintain we mistaken? Has ruffianism in Mississippi reached that point where the Governor of the State is powerless to control it? It must be controlled, and that speedily. Are the State authorities powerful or are they powerless? We know very well that public sentiment in that State regards these ebullitions of ruffianism with unspeakable horror, but public sentiment is worthless unless it makes itself felt in the direction of peace and good order. If the Gov-ernor of Mississippi feels that he is unable to cope with the political bashi-bazouks that infest the State, then it is his duty either to convene the legislature or to call upon the government for troops to suppress the outbreaks; for it cannot be denied that the wisest, most just and easiest solution of ruffianism that has outgrown the powers of a State

The North American line was organized under the auspices of Messrs. Zenus Barnum, Josiah Lee, A. S. Abell and others, Mr. Barnum being the president of the company. Great difficulty was encountered in getting the right of way through Naw Jersey. Mr. Rogers way through New Jersey. Mr. Rogers was also the superintendent of the Bankers and Brokers' line, of which Mr. Enoch Pratt was president, and which was subsequently consolidated with the Western Union. His last con-nection was with the Southern and Atlantic line, as general superintendent. He was the inventor and owner of Roger's commercial code of signals, which has been adopted by the American and British governments. He subsequently disposed of part interest in this code to George. W. Blunt, former pilot commissioner at New York, and Captain Coston, of the navy. Mr. W. B. Clarke. the whig candidate for Governor, opposed to E. Louis Lowe, was also associated with Mr. Rogers in the signal enterprise, the latter going to Europe twice on business connected with its adoption by the British government. He leaves a widow and four sons, two living in New York, the others in Baltimore, the native city of their father. Cyrus W. Field and the late Marshall Lefferts, former superintendent of the Western Union Telegraph Company, were intimate ac quaintances of Mr. Rogers.

A Capias Issued for George W. Swep-

A capias was issued yesterday for George W. Swepson. A News reporter gathers the following as the facts. A motion was made early in this term, after notice given, to amend the record of the cause pending against George W. Swepson, in which it was alleged that the entry of a verdict of not guilty had been procured by fraud. Mr. Swepson was not in court when the motion reached, and it being stated by his counsel that he would be here yesterday, the motion was adjourned over till then for hearing, the judge deeming it proper that in an indictment of that nature the defendant should be present. Yesterday the motion was called up, when it was ascertained that Mr. Swepson had returned here the day before but had, for reasons best known to him self, again taken himself off to Ala mance. On an affidavit of these fact being filed, Judge Avera issued capias to the sheriffs of Wake and Alamance to take the body of the defendant and produce him on Wednesday next at the court house in Raleigh when the motion will be heard, with leave to the sheriff to take bail in the sum of \$10,000 to secure his appearance at that time.

Judge Fowle, on the part of Mr. Swepson, prayed an appeal from the order granting the capias, but Judge Avera ruled that no appeal lay.

It is rumored that application will be holding court at Alamance.

A Ruined Place-Poor People-Yet They opened their Doors to All Incidents of the Wrock.

The special correspondent of the News has returned, and, as he graphically states, "the half has not been told." The News has furnished many of the main incidents, and should we undertake to describe them from each man's statement, it would fill columns of our paper. An endeavor has been made to do full justice to each and all, but the readers of the NEWS will not fail to see that a reporter not on the

General Basil C. Manly, of Raleigh,

The School Law. The Supreme Court has not yet promulgated its decision, though it is un-derstood that the Judges have made up their minds regarding the new school law. As the county commissioners meet next week to complete the tax list, it is all-important that it be known whether the tax is to be computed under the law now on the statute book or under the act under consideration by the Court of last resort. There is a difference of one and two-thirds cents on property, and five cents on the poll, in these laws; and if the Court should not make known the decision arrived at before next week much trouble will be the result. Some counties having added this one and two-thirds cents to the county taxes, a decision in favor of the new act will necessitate a loss of this amount to the county levy and a general tearing up of tax calculators. The decision should be made public, we respectfully submit.

Let the wire be so long as to extend about a foot and a but a feet and a pour a grant of the second state of half above the can. Put a small quantity of sulphur into the can and on the sulphur pour a little alcohol. Set the alcohol on the fire and let the cup down into the sink by means of a string attached to the wire. Cover up the openings as much as possible, so as to keep the fumes of the burning sulphur within the sink and let it remain there till it burns out. This process should be repeated two or three times a week. The sulphuric acid gas generated will effectually destroy every germ of malaria with which it comes in contact. Of course care should be taken to prevent setting the building on fire, and no one should breathe any of the fumes

BEAUFORT NEEDS HELP. In yesterday morning's News appeared an appeal from the citizens of Beaufort for aid, directed to Governor Jarvis. The amount asked for by the people of that place is not large, yet they need it. Beaufort is a fishing place, and while the inhabitants ordinarily can make a good living at that business, still they are unable to accumulate much for stowage in banks. The late storm has inflicted much injury there; hotels and stores have been swept away; those engaged in mercantile pursuits have lost their all. Breadstuffs in stock have been ruined. They are now actually dependent on farmers in the immediate vicinage for food.

When the disaster fell on that village there were hundreds of visitors from different sections of the State enjoying themselves at the seaside hotels. They lost necessary clothing and other effects; they were obliged to ask for shelter from the storm. This was not denied in any instance. The people of Beaufort opened their doors. What food they had was freely shared with the unfortunates. What clothing was needed, was taken from private wardrobes. Not a cent was asked-not a cent given.

Beaufort's people are on the verge of famine. They have given all out of their humanity. The temporary aid they ask should be freely given in re-

THE PRESS CONVENTION.

The proceedings of the State Press Association were concluded at Goldsboro Wednesday night. The meeting was harmonious and conducted through out in a most satisfactory manner. In many respects it was the most important of any of the annual conventions of this body. Matters of concern to the business interests of the Press of the State were freely and intelligently discussed by its members, and resulted in the adoption of plans that will be of much benefit to the fraternity.

The meeting has accomplished much good and its effects will be felt by the newspaper men of North Carolina for a long time to come. The editor of this paper is more than gratified at the kind reception extended to him and is proud to acknowledge allegiance to an organof the State.

A GENTLEMAN from the west states that the name of Dr. J. M. Worth, the honest Treasurer of North Carolina has been urged in certain sections as the most suitable nominee for the Governorship at the convention of 1880. Among the potential candidates for that lofty position the name of Worth will fall like a pall upon their ambitious hopes.

THE Editor of the NEWS is indebted to the editor of the Tarboro Southerner for a very flattering compliment. Such expressions are calculated to make a young man very vain.

"FOR ONE STAR DIFFERETH FROM ANOTHER STAR IN GLORY."

[The following was contributed by an old and valued correspondent, and we give it space without fully endorsing it. The tone of the article would involve Mrs. Sprague in Mr. Conkling's moral ruin, and as every one is presumed legally to be innocent until proven guilty, she certainly is entitled to the benefit of the doubt. No matter how much we may dislike Mr. Conkling's political course, it is no light thing to triflle with a woman's fair fame, and should we make an unfounded assertion we would certainly stand in the same light as Mr. Conk-

This is as true in the political world as in the astronomical, for all the great particular stars in the political heavens differ from each other in glory.

Let us for a moment use our glasses and discover if we can what particular glory belongs to mighty orbs that dwell in the Radical heavens.

We come first to the Ohio system. In its center there blazes a star discovered by astronomer Bradley in 1876, called the Fraud. Among its satellites we find divers other smaller stars, all radiant with the same hue, commonly known as the Sherman, the Evarts, the Devens, the Key, the Schurz, the Thompson, and the McCrary. These stars are not of the first magnitude, but belong to what is known as the electoral belt, and derive their chief glory from the name and character of the center stars of the group. Looming up in the east we find rather a large bright star called the Blaine; its glory consists chiefly in suppressing letters which might have paled its luster. We next see further to the north the great red star, called the Chandler, whose chief glory consists in employing "Indian agents" at enormous sums of money belonging to the United States treasury, to civilize the savages of Indiana. Next in point of distinction we see a star once radiant, but now a little obscure, called the Colfax. This star's glory consisted in Credit-Mobilier transactions.

With his red snout and pompous strut he borrowed grace from the turkey gobbler whose importance electrified the denizens of the barnyard. This wonderful god, on more than one occasion in his condescensions, essayed to teach thirteen millions of people, not only patriotism and loyalty, but manners and social othics as well, but they would none of his counsel. A born pirate in the school of virtue, he possessed none of those qualities of discriminating honor among gentlemen, which would entitle him to the hospitalities of good and honorable men. But, notwithstanding all this, under the cloak of a great intellect, and beneath the garb of extreme national and loyal professions, he rested for a while in his vain-glorious assumptions in selfassured security, and quasi respectability. But in a moment of unguarded lust, and in the very presence of the victim of his dishonorable attentions, he was uncloaked before the world, as a libertine and a dog, unworthy the name of father, husband, senator, gentleman. He has perpetrated a wrong ization representing the best material upon his innocent family for which a life of devotion cannot appease, and has inflicted disgrace, dishonor and shame upon the man and woman who, relying upon his honor as a gentleman, and great name as a statesman, extended to him the hospitalities of their home; and asked advice as to the settlement of their litigated estates. Truly, oh Conkling, thou dost differ from all the other stars in glory, but it is a glory so in-

TARBORO, N. C., 1878.

DR. H. R. STEVENS:

Dear Sir,—I feel very grateful for what your valuable medicine, Vegetine, has done in my family. I wish to express my thanks by informing you of the wonderful cure of my son; also, to let you know that Vegetine is the best medicine I ever saw for Chills, Shakes, Fever and Ague. My son was sick with measles in 1873, which left him with Hip-joint disease. My son suffered a great deal of pain, all of the time; the pain was so great he did nothing but cry. The doctors did not help him a particle, he could not lift his foot from the floor, he could not move without crutches. I read your advertisement in the "Louisville Courier-Journal," that Vegetine was a great Blood Purifier and Blood Food. I tried one bottle, which was a great benefit. He kept on with the medicine, gradually gaining. He has taken eighteen bottles in all and he is completely restored to health, walks without crutches or cane. He is twenty years of age, who is subject to chills. Whenever he feels one coming on, he comes in, takes a dose of Vegetine and that is the last of the Chill. Vegetine leaves no bad effect upon the system like most of the medicines recommended for Chills. I cheerfully recommend Vegetine for such complaints. I think it is the greatest medicine in the world.

Respectfully, MRS. J. W. LLOYD, VEGETINE.—When the blood becomes in fellers and stagnant, either from change of

A SPECIALTY. Repairing Promptly and Carefully

Done. Talbott's Patent Spark Arrester, THE INVENTION OF THE AGE. Talbott's new Patent Spark Arrester is really the only perfect and reliable one, and is superseding all others in use. The great efficiency of this Arrest-

er is attracting universal attention, and is being endorsed by the best mechanical engineers and insurance companies. Its prominent features are:

It does not destroy the draft.

It does not interfere with cleaning the tubes

It will not enoue up, and requires no It requires no direct dampers to be opened when raising steam (dampers being objectionable, as they may be left open and allow sparks to escape.) It requires no water to extinguish sparks, which, by condensation, destroys the draft. Besides, when water is used, if neglected, the efficiency is

destroyed by evaporation of the water, and the boiler is kept in a filthy condition.
It is simple and durable, and can be

relied upon.

It can be attached to any boiler. No planter should be without one of them. Insurance companies will in-sure gins and barns where the Talbott Engines and Spark Arresters are used at same rate as harged for water or norse-power.

Now I am on this enthralling subof dress, I must not forget to tell of the painted dresses, which are works of art, and show the decorating mania has made progress. Last sum-mer the first painted dress seen here was worn by the wife of a United States officer, the gallant soldier himself being the artist. This year there have been several of these decorated dresses, one a white silk, strewn with apple-blossoms; another a pink silk, starred with daisies; another a light blue, with lilies of the valley. Each of these, I have been told, was a labor of love by the wearer or the wearer's friend.

LAGER BEER

REMEDIES

Infallibly Cure all Skin and Scalp Diseases, Scaly Eruptions, Itchings, and Irritations

The testimonials of permanent cures of skin and Scalp Diseases which have been the torture of a lifetime by the Cuticura gemedies, are more wonderful than any methods or remedies known to the medical methods or remedies known to the medical profession.

Cuticura Resolvent, a powerful Blood Purifier, is the only purifying agent which finds its way, into the circulating fluid and thence through the oil and sweat glands to the surface of the skin, thus destroying the poisonous elements with which these vessels have been daily charged. Cuticura, The Great Skin Cure, applied externally, arrests all unnatural or morbid growth which cover the surface of the diseased glands and tubes with Scaly, Itching, and Irritating Humors, speedily it removes them, leaving the pores open, healthy, and free from diseased particles of matter.

Thus internally and externally do these great remedies act in conjunction, performing cures that have astonished the most noted physicians of the day.

Salt Rheum for 30 Years
On the Head, Face, and Greater Parof the Body, Cured.

Messrs. Weeks & Potter: Gentlemen, I have been a great sufferer with Salt Rheum for 30 years, commencing in my head and face and extending over the greater part of my body. I have taken gallons of medicines for the blood of different kinds and tried good physicians, all of which did me no good, and I came to the conclusion that I could not be cured. But a friend called my attention to an article in the Union on skin diseases, and I got a box of Cuticura. The first application was a great relief and the third took the scales all off, and I felt like a new man. I have used three 50-cent boxes and my skin is smooth and I consider myseif entirely cured. Hoping that this may be seen by some one affleted as I have been (if there is any) is my earnest wish. And I cheerfully recommend it to all persons afflicted with like diseases.

Yours truly,

B. WILSON LORD.

AGAWAM, MASS., Sept. 9, 1878.

AGAWAM, MASS., Sept. 9, 1878. The Cuticura Soap should be used for deansing all diseased surfaces, as most soaps are injurious to the skin.

LEPROSY. A Modern Miracle. Astonishing Results from the use of Cuticura.

Messrs. Weeks & Potter: Gentlemen.—We have a case of Leprosy in our poorhouse which is being cured by your Cuticura remedies The county had employed all of our doctors and had sent to New York for advice, but to no avail.

The patient commenced using the Cuticura and immediately began getting better. He had been confined to his bed for two and one half years. Had not had his clothes on during this time. Last week he dressed for the first time.

When he walked, there would at least one quart of scales come off of him.

This happened every day.

We do not think he is cured, but he is in a fair way to be cured to say the least.

Yours truly,

DUNNING BROTHERS,

Druggists and Book ellers.

Allegan, Mich., Feb. 11, 1879.

Note.—Messrs. Dunning Brothers are thoroughly reliable gentlemen, and were unknown to us prior to the receipt of this letter. We firmly believe this Cuticura will permanently cure this very severe case of Leprosy, as it has done many others.

court dockets, was committed to jail by Justice Barbee yesterday in default of -Timothy Duch, a colored urchin

without mother or father, was picked up from out of the streets and bound out to Joel Holland, yesterday, by Judge Upchurch. -The following criminals were brought down by the sheriff of Halifax county and deposited in the peniten-tiary: George Rowland three years for

larceny, William Harriss one year for larceny, and Andrew Pearce five years for some offense. All colored. -The Mile-end spool cotton grows daily in popular favor. Yeargan, Petty & Jones, agents, are unable to keep the demand supplied. They find it neces-

sary to keep one thousand dozen in stock regularly in order to supply the wants of their large number of customers. No firms in the State are moving forward more rapidly than this enterprising house.

-A committee was appointed at a recent meeting of the Board of Aldermen, to purchase a pair of horses for the Rescue steam engine and for the general use of the City. The committee consisted of Messrs. J. H. McAlister. Joseph H. Green and Dr. James Mc-Kee. The horses purchased were sixteen hands high and not over ten years old nor under six.

A young steer, who has an innate detestation to "slaughter pens" but whose owner was attempting to force him to that delightful place, created quite an amusing excitement on Fayetteville street yesterday. The steer and its owner, evidently, could not agree as to the direction of the "pen" and it was "pull Jack pull Jill" for some time. Finally, by the aid of ropes and colored urchins he was forced to move in the

Quick Fortunes in Stocks

Vast sums of money are made in uick turns of stocks in Wall street. Business has never been more success ful. By the new combination plan, large and small investments (from \$25 to \$10,000) are combined in one vast sum, and operated by the most skillful experience, securing immense power in the stock market and gaining splendid profits. Thousands of customers are thus united in one concurr nt enterprise, and receive their pro rata profits monthly. An Indiana country merchant made \$17,892.41 in four opera-tions. A Texas cattle dealer made 32,615.94 in two combinations; a St. Louis shipping merchant made \$47,-876.21 in less than six months, all through the combination plan of Messrs. Lawrence & Co., which has cesses in the d the grandest suc history of the stock market. new circular, with "unerring rules for success," and complete explanations how to make money in stocks, mailed by Messrs. Lawrence & Co., Bankers. who has figured so extensively on the 57 Exchange Place, New York City.

No man can do a good job of work, reach a good sermon, try a law suit well, doctor a patient, or write a good article when he feels miserable and dull with sluggish brain and unsteady nerves, and none should make the attempt in such a condition when it can be so easily and cheaply removed by a little Hop Bitters. BOVINE, MISSISSIPPI, April 22, 1879. The following correspondence will explain itself: A. WADDILL, Esc., LYNCHBURG, VA.—Dear Sir: Observing a certificate from you in reference to the "Iron and Alum Mass," of the Seven Springs, in Washington county, Va., in relation to its efficacy for Liver

Diseases, would you have the kindness to inform me whether you used the "Mass" or the "Water;" also, & && scription of the symptoms and such other information as you may deem pertinent. I am a long-time sufferent with Liver Complaint, and naturally eel very anxious on the subject of a remedy that will afford me even temporary relief. Your early reply will greatly oblige, very respectfully, WILLIAM BARR.

LYNCHBURG, Va., May 12, 1879.-WM. BARR, Esq., Bovine, Mississippi—Dear Sir: Your inquiry in regard to the cured in my family from using the "Seven Springs Mass," is before me. The case referred to in my certificate was that of my wife's sister, who is now in her 80th year, and has been a member of my family for the last 27 years. She had been afflicted with Liver Disease for 30 years, sometimes almost dying with pains in the back, breast, and heaviness of the chest, heart-burns (intensely), sick stomach. vomiting, &c. I procured a few bottles of the "Mass" for her, and very soon after she began the use of it, her health commenced to get better, and she con-tinued steadily to improve, and at this writing, so old, seemingly in as good health as a person who had never been afflicted with these diseases. She attributes her cure entirely to the efficacy of the "Seven Springs Mass." I regard it one of the greatest family medicines we have access to, not only for such diseases as above indicated, but for various other complaints for which it is recommended. Hoping these answers satisfactory, I am, very truly, A. WAD-DILL, Proprietor Lynchburg News. For sale by Wm. Simpson, Pescud, Lee & Co., and F. H. Heartt, Raleigh, N. C., and Druggists generally.

GOOD PLAN

Anybody can learn to make money rapidly operating in stocks, by the "Two Unerring Reles for Success," in Messrs. Lawrence & Co.'s new circular. The combination method, which this firm has made so successful, enables people with large or small means to reap all the benefits of largest capital and best skill. Thousands of orders, in various sums, are pooled into one vast amount and co-operated as a mighty whose, thus securing to each shareholder all the advantages of the largest operator. Immense profits are divided monthly. Any amount, from \$5 to \$5,000, or more, can be used successfully. N Y Baptist Weekly, September 26th, 1878, says, "By the combination system \$15 would make \$75, or 5 per cent.; \$50 pays \$350, or 7 per cent.; \$100 makes \$1,000, or 10 per cent, on the stock, during the month, according to the market." Frank Leslie's Illustrated Newspaper, June 29th: "The combination method of operating stocks is the most successful ever adopted." New York Independent, Sept. 12th: "The combination system is founded upon correct business principles, and no person need be without an income while it is kept working by Messrs. Lawrence & Co." Brooklyn Journal, April 29th: "Our editor made a net profit of \$101.25 from \$20 in one of Messrs. Lawrence & Co.'s combination." New circular (mailed free) explains everything. Writes: * * * I cheerfully state that I have tested the virtues and efficiency of Colden's Liebig Liquid Extractof Beef in my private practice in cases of general debility, weakness, depression, dyspepsia, loss of appetite and nervous afflictions, when medicine had proven more than useless. I have found it the best remedy I ever used in Chronic Alcoholism, when the stomach is always irritable and food required to nourish. Sold by all Leading Druggists,
